6. Datatype Conversions

1. Write a program to Implicit Type Conversion
   Ex:
   Input :
   Enter Int value
   Enter Long value
   Output :
   Int value - 53
   Long value - 53

2. Write an example of explicit type conversion
   Ex:
   Input :
   Enter Value of I
   Output :
   Value of I is 34

3. Write a program of built in type conversion methods
   Ex:
   Input :
   Enter string name
   Enter Integer value
   Output :
   string to float - 34.6
   int to double - 337

4. Write a program that converts various value types to string type
   Ex:
   Input :
   Enter Integer value
   Enter Float Value
   Output :
   int.ToString() - 75
   float.ToString()- 43.09
