13.Polymorphism

1. Write a program on A class has two methods with the same name "Add" but with different input parameters (the first method has three parameters and the second method has two parameters) in c#

2. Write a program on Runtime polymorphism in c#

3. Write a program on taking one method with same but different signature in the methods in c#

4. Write a program to demonstrate the function overloading by changing the Data types of the parameters in c#

5. Write a program to demonstrate the function overloading by changing the Order of the parameters in c#
